2021 INSPECTION

In the 2021 inspection of Weinberg & Company, P.A., the Public Company Accounting Oversight Board (PCAOB) assessed the firm's compliance with laws, rules, and professional standards applicable to the audits of public companies.

We selected for review two audits of issuers with fiscal years ending in 2020. For each issuer audit selected, we reviewed a portion of the audit. We also evaluated elements of the firm's system of quality control.

2021 Inspection Approach

In selecting issuer audits for review, we use a risk-based method of selection. We make selections based on (1) our internal evaluation of audits we believe have a heightened risk of material misstatement, including those with challenging audit areas, and (2) other risk-based characteristics, including issuer and firm considerations. In certain situations, we may select all of the firm's issuer audits for review.

When we review an audit, we do not review every aspect of the audit. Rather, we generally focus our attention on audit areas we believe to be of greater complexity, areas of greater significance or with a heightened risk of material misstatement to the issuer's financial statements, and areas of recurring deficiencies. We may also select some audit areas for review in a manner designed to incorporate unpredictability.

Our selection of audits for review does not necessarily constitute a representative sample of the firm's total population of issuer audits. Additionally, our inspection findings are specific to the particular portions of the issuer audits reviewed. They are not an assessment of all of the firm's audit work nor of all of the audit procedures performed for the audits reviewed.

View the details on the [scope of our inspections and our inspections procedures](#).

OVERVIEW OF THE 2021 INSPECTION AND HISTORICAL DATA BY INSPECTION YEAR

The following information provides an overview of our 2021 inspection as well as data from the previous inspection. We use a risk-based method to select audits for review and to identify areas on which we focus our review. Because our inspection process evolves over time, it can, and often does, focus on a different mix of audits and audit areas from inspection to inspection and firm to firm. Further, a firm's business, the applicable auditing standards, or other factors can change from the time of one inspection to the next. As a result of these variations, we caution that our inspection results are not necessarily comparable over time or among firms.

Firm Data and Audits Selected for Review

	2021	2018
Firm data		
Total issuer audit clients for which the firm was the principal auditor at the outset of the inspection procedures	23	25
Total engagement partners on issuer audit work¹	3	3
Audits reviewed		
Total audits reviewed²	2	3
Audits in which the firm was the principal auditor	2	3
Audits with Part I.A deficiencies	2	0

If we include a deficiency in Part I.A of our report, it does not necessarily mean that the firm has not addressed the deficiency. In many cases, the firm has performed remedial actions after the deficiency was identified. Depending on the circumstances, remedial actions may include performing additional audit procedures, informing management of the issuer of the need for changes to the financial statements or reporting on internal control over financial reporting (ICFR), or taking steps to prevent reliance on prior audit reports.

Our inspection may include a review, on a sample basis, of the adequacy of a firm's remedial actions, either with respect to previously identified deficiencies or deficiencies identified during the current

¹ The number of engagement partners on issuer audit work represents the total number of firm personnel (not necessarily limited to personnel with an ownership interest) who had primary responsibility for an issuer audit (as defined in AS 1201, *Supervision of the Audit Engagement*) during the twelve-month period preceding the outset of the inspection.

² The population of issuer audits from which audits are selected for review may differ from the issuer audits at the outset of the inspection procedures due to variations such as new issuer audit clients for which the firm has not yet issued an audit report or issuer audit clients lost prior to the outset of the inspection.

inspection. If a firm does not take appropriate actions to address deficiencies, we may criticize its system of quality control or pursue a disciplinary action.

If we include a deficiency in our report — other than those deficiencies for audits with incorrect opinions on the financial statements and/or ICFR — it does not necessarily mean that the issuer's financial statements are materially misstated or that undisclosed material weaknesses in ICFR exist. It is often not possible for us to reach a conclusion on those points based on our inspection procedures and related findings because, for example, we have only the information that the auditor retained and the issuer's public disclosures. We do not have direct access to the issuer's management, underlying books and records, and other information.

Audit Areas Most Frequently Reviewed

This table reflects the audit areas we have selected most frequently for review in the 2021 inspection and the previous inspection. For the issuer audits selected for review, we selected these areas because they were generally significant to the issuer's financial statements, may have included complex issues for auditors, and/or involved complex judgments in (1) estimating and auditing the reported value of related accounts and disclosures and (2) implementing and auditing the related controls.

2021		2018	
Audit area	Audits reviewed	Audit area	Audits reviewed
Revenue and related accounts	2	Revenue and related accounts	3
Cash and cash equivalents	1	Cash and cash equivalents	2
Inventory	1	Inventory	2
Accruals and other liabilities	1	Long-lived assets	1

PART I: INSPECTION OBSERVATIONS

Part I.A of our report discusses deficiencies, if any, that were of such significance that we believe the firm, at the time it issued its audit report(s), had not obtained sufficient appropriate audit evidence to support its opinion on the issuer's financial statements and/or ICFR.

Part I.B discusses deficiencies, if any, that do not relate directly to the sufficiency or appropriateness of evidence the firm obtained to support its opinion(s) but nevertheless relate to instances of non-compliance with PCAOB standards or rules.

Consistent with the Sarbanes-Oxley Act ("Act"), it is the Board's assessment that nothing in Part I of this report deals with a criticism of, or potential defect in, the firm's quality control system. We discuss any such criticisms or potential defects in Part II. Further, you should not infer from any Part I deficiency, or combination of deficiencies, that we identified a quality control finding in Part II. Section 104(g)(2) of the Act restricts us from publicly disclosing Part II deficiencies unless the firm does not address the criticisms or potential defects to the Board's satisfaction no later than 12 months after the issuance of this report.

Classification of Audits with Part I.A Deficiencies

Within Part I.A of this report, we classify each issuer audit in one of the categories discussed below based on the Part I.A deficiency or deficiencies identified in our review.

The purpose of this classification system is to group and present issuer audits by the number of Part I.A deficiencies we identified within the audit as well as to highlight audits with an incorrect opinion on the financial statements and/or ICFR.

Audits with an Incorrect Opinion on the Financial Statements and/or ICFR

This classification includes instances where a deficiency was identified in connection with our inspection and, as a result, an issuer's financial statements were determined to be materially misstated, and the issuer restated its financial statements. It also includes instances where a deficiency was identified in connection with our inspection and, as a result, an issuer's ICFR was determined to be ineffective, or there were additional material weaknesses that the firm did not identify, and the firm withdrew its opinion, or revised its report, on ICFR. This classification does not include instances where, unrelated to our review, an issuer restated its financial statements and/or an issuer's ICFR was determined to be ineffective. We include any deficiencies identified in connection with our reviews of these audits in the audits with multiple deficiencies or audits with a single deficiency classification below.

Audits with Multiple Deficiencies

This classification includes instances where multiple deficiencies were identified that related to a combination of one or more financial statement accounts, disclosures, and/or important controls in an ICFR audit.

Audits with a Single Deficiency

This classification includes instances where a single deficiency was identified that related to a financial statement account or disclosure or to an important control in an ICFR audit.

PART I.A: AUDITS WITH UNSUPPORTED OPINIONS

This section of our report discusses the deficiencies identified, by specific issuer audit reviewed, in the audit work supporting the firm's opinion on the issuer's financial statements.

We identify each issuer by a letter (e.g., Issuer A). Each deficiency could relate to several auditing standards, but we reference the PCAOB standard(s) that most directly relates to the requirement with which the firm did not comply.

We present issuer audits below within their respective deficiency classifications (as discussed previously). Within the classifications, we generally present the audits based on our assessment as to the relative significance of the identified deficiencies, taking into account the significance of the financial statement accounts and/or disclosures affected, and/or the nature or extent of the deficiencies.

Audits with an Incorrect Opinion on the Financial Statements and/or ICFR

None

Audits with Multiple Deficiencies

Issuer A – Industrials

Type of audit and related area affected

In our review, we identified deficiencies in the financial statement audit related to **Inventory**.

Description of the deficiencies identified

To substantively test the valuation of inventory, the firm developed an independent expectation with respect to certain inventory. The following deficiencies were identified:

- The firm did not perform any procedures to test the valuation of inventory that was not included in its independent expectation. (AS 1105.27; AS 2301.08)
- The firm did not perform any procedures to demonstrate it had a reasonable basis for certain assumptions it developed. (AS 2501.22)
- The firm did not perform procedures, beyond inquiry, to evaluate the reasonableness of certain assumptions it used that the issuer developed. (AS 2501.24)

- The firm did not perform any procedures to evaluate the relevance and reliability of certain assumptions it obtained from an external appraiser. (AS 1105.04 and .06; AS 2501.23)
- The firm did not perform any substantive procedures to test the completeness of certain data it used. (AS 2501.24)

Issuer B

Type of audit and related areas affected

In our review, we identified deficiencies in the financial statement audit related to a **Warrant Liability** and **Journal Entries**.

Description of the deficiencies identified

With respect to a **Warrant Liability**:

The issuer reported a warrant liability. The firm's approach for substantively testing the fair value of this liability was to test the issuer's process. The firm did not evaluate the relevance of certain data the issuer used to develop a significant assumption. (AS 1105.04 and .06) In addition, the firm did not evaluate whether this assumption was consistent with certain information, including existing market information and historical and recent experience related to the issuer's stock, taking into account changes in conditions and events affecting the issuer. (AS 2501.16)

With respect to **Journal Entries**:

The issuer recorded (1) journal entries into the general ledger during the financial reporting period and (2) adjustments during the period end financial reporting process. The firm selected for testing journal entries and adjustments meeting certain fraud criteria. The following deficiencies were identified:

- The firm did not perform any procedures to test the completeness of the population of adjustments. (AS 1105.10)
- The firm did not perform sufficient procedures to test the completeness of the population of journal entries because it limited its procedures to observation of the issuer downloading the journal entries and rolling forward certain equity accounts. (AS 1105.10)
- The firm did not perform sufficient procedures to test the selected journal entries and adjustments because it did not examine the underlying support for the entries. (AS 2401.61)

Audits with a Single Deficiency

None

PART I.B: OTHER INSTANCES OF NON-COMPLIANCE WITH PCAOB STANDARDS OR RULES

This section of our report discusses any deficiencies we identified that do not relate directly to the sufficiency or appropriateness of evidence the firm obtained to support its opinion(s) but nevertheless relate to instances of non-compliance with PCAOB standards or rules.

When we review an audit, we do not review every aspect of the audit. As a result, the area below was not necessarily reviewed on every audit. In some cases, we assess the firm's compliance with specific PCAOB standards or rules on other audits that were not reviewed and include any instances of non-compliance below.

We identified the following deficiencies:

In the two audits reviewed, the work papers did not contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand all of the procedures performed by the engagement quality reviewer, including evidence that the engagement quality reviewer evaluated the engagement team's responses to the significant risks identified. In these instances, the documentation of the engagement quality review was non-compliant with AS 1220, *Engagement Quality Review*.

PART II: OBSERVATIONS RELATED TO QUALITY CONTROL

Part II of our report discusses criticisms of, and potential defects in, the firm's system of quality control.

We include deficiencies in Part II if an analysis of the inspection results, including the results of the reviews of individual audits, indicates that the firm's system of quality control does not provide reasonable assurance that firm personnel will comply with applicable professional standards and requirements. Generally, the report's description of quality control criticisms is based on observations from our inspection procedures.

This report does not reflect changes or improvements to the firm's system of quality control that the firm may have made subsequent to the period covered by our inspection. The Board does consider such changes or improvements in assessing whether the firm has satisfactorily addressed the quality control criticisms or defects no later than 12 months after the issuance of this report.

When we issue our reports, we do not make public criticisms of, and potential defects in, the firm's system of quality control, to the extent any are identified. If a firm does not address to the Board's satisfaction any criticism of, or potential defect in, the firm's system of quality control within 12 months after the issuance of our report, we will make public any such deficiency.

APPENDIX A: FIRM'S RESPONSE TO THE DRAFT INSPECTION REPORT

Pursuant to Section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(a), the firm provided a written response to a draft of this report. Pursuant to Section 104(f) of the Act and PCAOB Rule 4007(b), the firm's response, excluding any portion granted confidential treatment, is attached hereto and made part of this final inspection report.

The Board does not make public any of a firm's comments that address a nonpublic portion of the report unless a firm specifically requests otherwise. In some cases, the result may be that none of a firm's response is made publicly available.

In addition, pursuant to Section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(b), if a firm requests, and the Board grants, confidential treatment for any of the firm's comments on a draft report, the Board does not include those comments in the final report. The Board routinely grants confidential treatment, if requested, for any portion of a firm's response that addresses any point in the draft that the Board omits from, or any inaccurate statement in the draft that the Board corrects in, the final report.

WEINBERG & COMPANY, P.A.
CERTIFIED PUBLIC ACCOUNTANTS

August 11, 2022

Mr. George Botic, Director
Division of Registration and Inspections
Public Company Accounting Oversight Board
1666 K Street NW
Washington, D.C. 20006-2803

Public Response to the Draft Report on the 2021 Inspection of Weinberg & Company, P.A.

Dear Mr. Botic:

We appreciate the opportunity to provide a public response to the Public Company Accounting Oversight Board (the "Board" or the "PCAOB") regarding the Draft Report on the 2021 Inspection of Weinberg & Company P.A. (the "Report").

We continue to support the PCAOB and we wish to convey our sincere appreciation for the professional efforts of the PCAOB Staff. We recognize our responsibility to assist the PCAOB in its efforts to protect the interests of investors and further the public interest through the preparation of informative, accurate and independent audit reports. Our overriding objective is to make certain that all aspects of our auditing and quality control processes are of the highest quality and continue to benefit the capital markets. Overall, we believe the PCAOB's inspection process assists us in identifying areas where we can continue to improve our performance.

We remain committed to continual improvement in our audit practice and making responsive changes in areas identified by the PCAOB for improvement, and look forward to continuing to work with the PCAOB towards the shared goal of audit quality.

Sincerely,

Weinberg & Company, P.A.
