## 2023 INSPECTION

In the 2023 inspection of T.E. Lott and Company, A Professional Association, the Public Company Accounting Oversight Board (PCAOB) assessed the firm's compliance with laws, rules, and professional standards applicable to the audits of public companies.

We selected for review one audit of an issuer with a fiscal year ending in 2021. For the issuer audit selected, we reviewed a portion of the audit. We also evaluated elements of the firm's system of quality control.

### 2023 Inspection Approach

In selecting issuer audits for review, we use a risk-based method of selection. We make selections based on (1) our internal evaluation of audits we believe have a heightened risk of material misstatement, including those with challenging audit areas, and (2) other risk-based characteristics, including issuer and firm considerations. In certain situations, we may select all of the firm's issuer audits for review.

When we review an audit, we do not review every aspect of the audit. Rather, we generally focus our attention on audit areas we believe to be of greater complexity, areas of greater significance or with a heightened risk of material misstatement to the issuer's financial statements, and areas of recurring deficiencies. We may also select some audit areas for review in a manner designed to incorporate unpredictability.

Our selection of audits for review does not necessarily constitute a representative sample of the firm's total population of issuer audits. Additionally, our inspection findings are specific to the particular portions of the issuer audits reviewed. They are not an assessment of all of the firm's audit work or of all of the audit procedures performed for the audits reviewed.

View the details on the [scope of our inspections and our inspections procedures](#).

# OVERVIEW OF THE 2023 INSPECTION

The following information provides an overview of our 2023 inspection. We use a risk-based method to select audits for review and to identify areas on which we focus our review. Because our inspection process evolves over time, it can, and often does, focus on a different mix of audits and audit areas from inspection to inspection and firm to firm. Further, a firm's business, the applicable auditing standards, or other factors can change from the time of one inspection to the next. As a result of these variations, we caution that our inspection results are not necessarily comparable over time or among firms.

## Firm Data and Audits Selected for Review

	2023
<b>Firm data</b>	
<b>Total issuer audit clients in which the firm was the principal auditor</b>	1
<b>Total engagement partners on issuer audit work<sup>1</sup></b>	1
<b>Audits reviewed</b>	
<b>Total audits reviewed</b>	1
<b>Audits in which the firm was the principal auditor</b>	1
<b>Integrated audits of financial statements and internal control over financial reporting (ICFR)</b>	0
<b>Audits with Part I.A deficiencies</b>	1
<b>Percentage of audits with Part I.A deficiencies</b>	100%

If we include a deficiency in Part I.A of our report, it does not necessarily mean that the firm has not addressed the deficiency. In many cases, the firm has performed remedial actions after the deficiency was identified. Depending on the circumstances, remedial actions may include performing additional audit procedures, informing management of the issuer of the need for changes to the financial statements or reporting on ICFR, or taking steps to prevent reliance on prior audit reports.

Our inspection may include a review, on a sample basis, of the adequacy of a firm's remedial actions, either with respect to previously identified deficiencies or deficiencies identified during the current inspection. If a firm does not take appropriate actions to address deficiencies, we may criticize its system of quality control or pursue a disciplinary action.

<sup>1</sup> The number of engagement partners on issuer audit work represents the total number of firm personnel (not necessarily limited to personnel with an ownership interest) who had primary responsibility for an issuer audit (as defined in AS 1201, *Supervision of the Audit Engagement*) during the twelve-month period preceding the outset of the inspection.

If we include a deficiency in our report — other than those deficiencies for audits with incorrect opinions on the financial statements and/or ICFR — it does not necessarily mean that the issuer’s financial statements are materially misstated or that undisclosed material weaknesses in ICFR exist. It is often not possible for us to reach a conclusion on those points based on our inspection procedures and related findings because, for example, we have only the information that the auditor retained and the issuer’s public disclosures. We do not have direct access to the issuer’s management, underlying books and records, and other information.

## Audit Areas Most Frequently Reviewed

This table reflects the audit areas we have selected most frequently for review in the 2023 inspection. For the issuer audit selected for review, we selected these areas because they were generally significant to the issuer’s financial statements, may have included complex issues for auditors, and/or involved complex judgments in (1) estimating and auditing the reported value of related accounts and disclosures and (2) implementing and auditing the related controls.

2023	
Audit area	Audits reviewed
Allowance for loan losses	1
Loans and related accounts	1

# PART I: INSPECTION OBSERVATIONS

Part I.A of our report discusses deficiencies, if any, that were of such significance that we believe the firm, at the time it issued its audit report(s), had not obtained sufficient appropriate audit evidence to support its opinion(s) on the issuer's financial statements and/or ICFR.

Part I.B discusses certain deficiencies, if any, that relate to instances of non-compliance with PCAOB standards or rules other than those where the firm had not obtained sufficient appropriate audit evidence to support its opinion(s). This section does not discuss instances of potential non-compliance with SEC rules or instances of non-compliance with PCAOB rules related to maintaining independence.

Part I.C discusses instances of potential non-compliance with SEC rules or instances of non-compliance with PCAOB rules, if any, related to maintaining independence.

Consistent with the Sarbanes-Oxley Act ("Act"), it is the Board's assessment that nothing in Part I of this report deals with a criticism of, or potential defect in, the firm's quality control system. We discuss any such criticisms or potential defects in Part II. Further, you should not infer from any Part I deficiency, or combination of deficiencies, that we identified a quality control finding in Part II. Section 104(g)(2) of the Act restricts us from publicly disclosing Part II deficiencies unless the firm does not address the criticisms or potential defects to the Board's satisfaction no later than 12 months after the issuance of this report.

## Classification of Audits with Part I.A Deficiencies

Within Part I.A of this report, we classify each issuer audit in one of the categories discussed below based on the Part I.A deficiency or deficiencies identified in our review.

The purpose of this classification system is to group and present issuer audits by the number of Part I.A deficiencies we identified within the audit as well as to highlight audits with an incorrect opinion on the financial statements and/or ICFR.

## Audits with an Incorrect Opinion on the Financial Statements and/or ICFR

This classification includes instances where a deficiency was identified in connection with our inspection and, as a result, an issuer's financial statements were determined to be materially misstated, and the issuer restated its financial statements. It also includes instances where a deficiency was identified in connection with our inspection and, as a result, an issuer's ICFR was determined to be ineffective, or there were additional material weaknesses that the firm did not identify, and the firm withdrew its opinion, or revised its report, on ICFR.

This classification does not include instances where, unrelated to our review, an issuer restated its financial statements and/or an issuer's ICFR was determined to be ineffective. We include any deficiencies identified in connection with our reviews of these audits in the audits with multiple deficiencies or audits with a single deficiency classification below.

## Audits with Multiple Deficiencies

This classification includes instances where multiple deficiencies were identified that related to a combination of one or more financial statement accounts, disclosures, and/or important controls in an ICFR audit.

## Audits with a Single Deficiency

This classification includes instances where a single deficiency was identified that related to a financial statement account or disclosure or to an important control in an ICFR audit.

# PART I.A: AUDITS WITH UNSUPPORTED OPINIONS

This section of our report discusses the deficiencies identified, by specific issuer audit reviewed, in the audit work supporting the firm's opinion on the issuer's financial statements.

We identify each issuer by a letter (e.g., Issuer A) and industry sector. Each deficiency could relate to several auditing standards, but we reference the PCAOB standard that most directly relates to the requirement with which the firm did not comply.

We present issuer audits below within their respective deficiency classifications (as discussed previously). Within the classifications, we generally present the audits based on our assessment as to the relative significance of the identified deficiencies, taking into account the significance of the financial statement accounts and/or disclosures affected, and/or the nature or extent of the deficiencies.

## Audits with an Incorrect Opinion on the Financial Statements and/or ICFR

None

## Audits with Multiple Deficiencies

### Issuer A – Financials

#### Type of audit and related areas affected

In our review, we identified deficiencies in the financial statement audit related to **Loans** and the **Allowance for Loan Losses (ALL)**.

#### Description of the deficiencies identified

With respect to **Loans** and the **ALL**, for which the firm identified significant risks:

The firm's approach to testing loans and the ALL included reliance on certain controls. The issuer used a service organization to process and record transactions related to loans, and this loan information was

used in the firm's procedures to test loans and the ALL. The firm did not perform procedures, beyond inquiring of management, to test complementary user controls over loans identified in the service auditor's report. (AS 2601.14)

With respect to the **ALL**:

The issuer's ALL consisted of a qualitative component and an unallocated reserve component. The firm's approach for substantively testing the ALL was to both test the issuer's process and develop an independent expectation of the estimate. The following deficiencies were identified:

- The firm used the issuer's loan grades in its independent expectation. The firm selected loans that met specific criteria to test the loan's assigned grade. The firm did not perform procedures to test loan grades for the remaining population of loans. (AS 1105.27; AS 2301.08 and .11)
- The firm did not evaluate whether the issuer had a reasonable basis for the significant assumptions it used to develop the qualitative component. (AS 2501.16)
- The firm did not evaluate the reasonableness of the significant assumptions the issuer used to develop the unallocated reserve component. (AS 2501.16)
- The firm did not evaluate the relevance of external information it used to develop its independent expectation. (AS 1105.04 and .06)
- The firm did not perform procedures to demonstrate it had a reasonable basis for certain assumptions it used to develop its independent expectation. (AS 2501.22)

## Audits with a Single Deficiency

None

## PART I.B: OTHER INSTANCES OF NON-COMPLIANCE WITH PCAOB STANDARDS OR RULES

This section of our report discusses certain deficiencies that relate to instances of non-compliance with PCAOB standards or rules other than those where the firm had not obtained sufficient appropriate audit evidence to support its opinion. This section does not discuss instances of potential non-compliance with SEC rules or instances of non-compliance with PCAOB rules related to maintaining independence.

When we review an audit, we do not review every aspect of the audit. In some cases, we assess the firm's compliance with specific PCAOB standards or rules on other audits that were not reviewed and include any instances of non-compliance below.

The deficiencies below are presented in numerical order based on the PCAOB standard or rule with which the firm did not comply. We identified the following deficiencies:

- In the audit reviewed, the firm, when testing journal entries for evidence of possible material misstatement due to fraud, did not perform sufficient procedures to determine whether the journal entry population from which it made its selections was complete. In this instance, the firm was non-compliant with AS 1105, *Audit Evidence*.
- In the audit reviewed, the firm added audit documentation subsequent to the 45-day period following the report release date and did not indicate the date the information was added, the name of the person who prepared the additional documentation, and the reason for adding it. In this instance, the firm was non-compliant with AS 1215, *Audit Documentation*.
- In the audit reviewed, the firm did not communicate to the audit committee all of the significant risks identified through its risk assessment procedures. In this instance, the firm was non-compliant with AS 1301, *Communications with Audit Committees*.
- In the audit reviewed, the firm did not inquire of the audit committee about whether it was aware of matters relevant to the audit, including, but not limited to, violations or possible violations of laws or regulations. In this instance, the firm was non-compliant with AS 1301, *Communications with Audit Committees*.
- In the audit reviewed, the firm did not inquire of the audit committee about the risks of material misstatement, including fraud risks. In this instance, the firm was non-compliant with AS 2110, *Identifying and Assessing Risks of Material Misstatement*.
- In the audit reviewed, the firm did not inquire of the audit committee regarding the audit committee's understanding of the issuer's relationships and transactions with related parties that were significant to the issuer and whether any member of the audit committee had concerns regarding relationships or transactions with related parties and, if so, the substance of those concerns. In this instance, the firm was non-compliant with AS 2410, *Related Parties*.

## PART I.C: INDEPENDENCE

In the 2023 inspection, we did not identify, and the firm did not bring to our attention, any instances of potential non-compliance with SEC rules or instances of non-compliance with PCAOB rules related to maintaining independence. Although this section does not include any instances of potential non-compliance that we identified or the firm brought to our attention, there may be instances of non-compliance with SEC or PCAOB rules related to independence that were not identified through our procedures or the firm's monitoring activities.

While the firm did not bring to our attention any instances of potential non-compliance, the number, large or small, of firm-identified instances of potential non-compliance may be reflective of the size of the firm, including the number of associated firms; the design and effectiveness of the firm's independence monitoring activities; and the size and/or complexity of the issuers it audits, including the number of affiliates of those issuers. Therefore, we caution against making any comparison of firm-identified instances of potential non-compliance across firms.

## PART II: OBSERVATIONS RELATED TO QUALITY CONTROL

Part II of our report discusses criticisms of, and potential defects in, the firm's system of quality control.

We include deficiencies in Part II if an analysis of the inspection results, including the results of the reviews of individual audits, indicates that the firm's system of quality control does not provide reasonable assurance that firm personnel will comply with applicable professional standards and requirements. Generally, the report's description of quality control criticisms is based on observations from our inspection procedures.

This report does not reflect changes or improvements to the firm's system of quality control that the firm may have made subsequent to the period covered by our inspection. The Board does consider such changes or improvements in assessing whether the firm has satisfactorily addressed the quality control criticisms or defects no later than 12 months after the issuance of this report.

When we issue our reports, we do not make public criticisms of, and potential defects in, the firm's system of quality control, to the extent any are identified. If a firm does not address to the Board's satisfaction any criticism of, or potential defect in, the firm's system of quality control within 12 months after the issuance of our report, we will make public any such deficiency.

## APPENDIX A: FIRM'S RESPONSE TO THE DRAFT INSPECTION REPORT

Pursuant to Section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(a), the firm provided a written response to a draft of this report. Pursuant to Section 104(f) of the Act and PCAOB Rule 4007(b), the firm's response, excluding any portion granted confidential treatment, is attached hereto and made part of this final inspection report.

The Board does not make public any of a firm's comments that address a nonpublic portion of the report unless a firm specifically requests otherwise. In some cases, the result may be that none of a firm's response is made publicly available.

In addition, pursuant to Section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(b), if a firm requests, and the Board grants, confidential treatment for any of the firm's comments on a draft report, the Board does not include those comments in the final report. The Board routinely grants confidential treatment, if requested, for any portion of a firm's response that addresses any point in the draft that the Board omits from, or any inaccurate statement in the draft that the Board corrects in, the final report.

October 19, 2023

Mr. George R. Botic, Director  
Division of Registration and Inspection  
Public Company Accounting Oversight Board  
1666 K. Street, N.W.  
Washington, DC 20006

Re: Response to Part I of the Draft Report on the 2023 Inspection of  
T. E. Lott and Company, A Professional Association

Dear Mr. Botic:

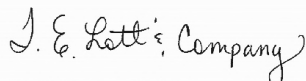

We appreciate the opportunity to respond to the Public Company Oversight Board's (PCAOB) draft report on the 2023 Inspection of T. E. Lott and Company, A Professional Association (the Report).

We are committed to the highest standards of audit quality for the benefit of investors and the public interest. We continually monitor our audit processes, and adjust our methodologies, policies, procedures, and guidance when we identify improvements that could enhance audit quality. We value the benefits of the PCAOB inspection process, as it serves to assist us in identifying areas where we can continue to improve our audit performance and strengthen our system of quality control.

We have carefully considered the matters identified in Part I of the Report and have taken actions, as appropriate, to comply with AS 2901, *Consideration of Omitted Procedures After the Report Date*, and where applicable, AS 2905, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* to address the matters in accordance with PCAOB standards and our policies. These actions included performing additional procedures when appropriate and adding documentation to our files to further describe and support our procedures and conclusions.

We look forward to working with the PCAOB and its staff to further our shared goals of improving audit quality and serving the public interest

Sincerely,

T. E. Lott and Company, A Professional Association
