

Report on

2014 Inspection of KBL, LLP
(Headquartered in New York, New York)

Issued by the

Public Company Accounting Oversight Board

October 30, 2014

THIS IS A PUBLIC VERSION OF A PCAOB INSPECTION REPORT

**PORTIONS OF THE COMPLETE REPORT ARE OMITTED
FROM THIS DOCUMENT IN ORDER TO COMPLY WITH
SECTIONS 104(g)(2) AND 105(b)(5)(A)
OF THE SARBANES-OXLEY ACT OF 2002**

2014 INSPECTION OF KBL, LLP

Preface

In 2014, the Public Company Accounting Oversight Board ("PCAOB" or "the Board") conducted an inspection of the registered public accounting firm KBL, LLP ("the Firm") pursuant to the Sarbanes-Oxley Act of 2002 ("the Act").

Inspections are designed and performed to provide a basis for assessing the degree of compliance by a firm with applicable requirements related to auditing issuers. For a description of the procedures the Board's inspectors may perform to fulfill this responsibility, see Part I.C of this report (which also contains additional information concerning PCAOB inspections generally). Overall, the inspection process included reviews of portions of selected issuer audits completed by the Firm. These reviews were intended to identify whether deficiencies existed in those portions of the inspected audits, and whether such deficiencies indicated defects or potential defects in the Firm's system of quality control over audits. In addition, the inspection included reviews of policies and procedures related to certain quality control processes of the Firm that could be expected to affect audit quality.

The Board is issuing this report in accordance with the requirements of the Act. The Board is releasing to the public Part I of the report and portions of Part IV of the report. Part IV of the report consists of the Firm's comments, if any, on a draft of the report. If the nonpublic portions of the report discuss criticisms of or potential defects in the firm's system of quality control, those discussions also could eventually be made public, but only to the extent the firm fails to address the criticisms to the Board's satisfaction within 12 months of the issuance of the report.

PROFILE OF THE FIRM¹

Number of offices	1 (New York, New York)
Ownership structure	Limited liability partnership
Number of partners	3
Number of professional staff ²	5
Number of issuer audit clients	21

¹ The information presented here is as understood by the inspection team, generally as of the outset of the inspection, based on the Firm's self-reporting and the inspection team's review of certain information. Additional information, including additional detail on audit reports issued by the Firm, is available in the Firm's filings with the Board, available at http://pcaobus.org/Registration/rasr/Pages/RASR_Search.aspx.

² The number of partners and professional staff is provided here as an indication of the size of the Firm, and does not necessarily represent the number of the Firm's professionals who participate in audits of issuers.

PART I

INSPECTION PROCEDURES AND CERTAIN OBSERVATIONS

Members of the Board's inspection staff ("the inspection team") conducted primary procedures for the inspection from May 19, 2014 to May 23, 2014.³

A. Review of Audit Engagements

The inspection procedures included a review of portions of three audits performed by the Firm. The inspection team identified a matter that it considered to be a deficiency in the performance of the work it reviewed. The deficiency relates to auditing an aspect of an issuer's financial statements that the issuer restated after the primary inspection procedures.⁴

The description of the deficiency in Part I.A of this report includes, at the end of the description of the deficiency, a reference to a specific paragraph of the auditing standard that relates to that deficiency. The text of that paragraph is set forth in Appendix A to this report. The reference in this sub-Part includes only the standard that primarily relates to the deficiency; it does not present a comprehensive list of every auditing standard that applies to the deficiency. Further, certain broadly applicable aspects of the auditing standards that may be relevant to a deficiency, such as provisions requiring due professional care, including the exercise of professional skepticism; the accumulation of sufficient appropriate audit evidence; and the performance of procedures that address risks, are not included in the reference to the auditing standard in this sub-Part, unless the lack of compliance with these standards is the primary reason for the deficiency. These broadly applicable provisions are described in Part I.B of this report.

³ For this purpose, "primary procedures" include field work, other review of audit work papers, and the evaluation of the Firm's quality control policies and procedures through review of documentation and interviews of Firm personnel. Primary procedures do not include (1) inspection planning, which is generally performed prior to primary procedures, and (2) inspection follow-up procedures, wrap-up, analysis of results, and the preparation of the inspection report, which generally extend beyond the primary procedures.

⁴ The Board inspection process did not include review of any additional audit work related to the restatement.

One of the deficiencies identified was of such significance that it appeared to the inspection team that the Firm, at the time it issued its audit report, had not obtained sufficient appropriate audit evidence to support its opinion that the financial statements were presented fairly, in all material respects, in accordance with the applicable financial reporting framework. In other words, in this audit, the auditor issued an opinion without satisfying its fundamental obligation to obtain reasonable assurance about whether the financial statements were free of material misstatement.

The fact that the deficiency reaches this level of significance does not necessarily indicate that the financial statements are misstated. It is often not possible for the inspection team, based only on the information available from the auditor, to reach a conclusion on those points.

Whether or not associated with a disclosed financial reporting misstatement, an auditor's failure to obtain the reasonable assurance that the auditor is required to obtain is a serious matter. It is a failure to accomplish the essential purpose of the audit, and it means that, based on the audit work performed, the audit opinion should not have been issued.⁵

The audit deficiency that reached this level of significance is described below—

Issuer A

the Firm's failure to identify, or to address appropriately, a departure from Generally Accepted Accounting Principles ("GAAP") that related to a potentially material misstatement in the audited financial statements concerning revenue recognition. (AS No. 14, paragraph 30)

⁵ Inclusion in an inspection report does not mean that the deficiency remained unaddressed after the inspection team brought it to the Firm's attention. Depending upon the circumstances, compliance with PCAOB standards may require the Firm to perform additional audit procedures, or to inform a client of the need for changes to its financial statements, or to take steps to prevent reliance on its previously expressed audit opinions. The Board expects that firms will comply with these standards, and the inspections staff may include in its procedures monitoring or assessing a firm's compliance.

B. Auditing Standards

The deficiency described above could relate to several applicable provisions of the standards that govern the conduct of audits, including both the paragraph of the standard that is cited at the end of the description of the deficiency included in Part I.A of this report and one or more of the specific paragraphs discussed below.

Many audit deficiencies involve a lack of due professional care. AU 230, *Due Professional Care in the Performance of Work* ("AU 230"), paragraphs .02, .05, and .06, requires the independent auditor to plan and perform his or her work with due professional care and sets forth aspects of that requirement. AU 230, paragraphs .07 through .09, and Auditing Standard ("AS") No. 13, *The Auditor's Responses to the Risks of Material Misstatement* ("AS No. 13"), paragraph 7, specify that due professional care requires the exercise of professional skepticism. These standards state that professional skepticism is an attitude that includes a questioning mind and a critical assessment of the appropriateness and sufficiency of audit evidence.

AS No. 13, paragraphs 3, 5, and 8, requires the auditor to design and implement audit responses that address the risks of material misstatement, and AS No. 15, *Audit Evidence* ("AS No. 15"), paragraph 4, requires the auditor to plan and perform audit procedures to obtain sufficient appropriate audit evidence to provide a reasonable basis for the audit opinion. Sufficiency is the measure of the quantity of audit evidence, and the quantity needed is affected by the risk of material misstatement (in the audit of financial statements) and the quality of the audit evidence obtained. The appropriateness of evidence is measured by its quality; to be appropriate, evidence must be both relevant and reliable in support of the related conclusions.

The table below lists the specific auditing standard that is referenced for the deficiency included in Part I.A of this report. See the description of the deficiency in Part I.A for identification of the specific paragraph, in addition to those noted above, that relate to that deficiency.

C. Information Concerning PCAOB Inspections Generally Applicable to Triennially Inspected Firms

Board inspections include reviews of certain portions of selected audit work performed by the inspected firm and reviews of certain aspects of the firm's quality control system. The inspections are designed to identify deficiencies in audits and defects or potential defects in the firm's system of quality control related to the firm's audits. The focus on deficiencies, defects, and potential defects necessarily carries through to reports on inspections and, accordingly, Board inspection reports are not intended to serve as balanced report cards or overall rating tools. Further, the inclusion in an inspection report of certain deficiencies, defects, and potential defects should not be construed as an indication that the Board has made any determination about other aspects of the inspected firm's systems, policies, procedures, practices, or conduct not included within the report.

C.1. Reviews of Audit Work

Inspections include reviews of portions of selected audits of financial statements and, where applicable, audits of internal control over financial reporting ("ICFR"). For these audits, the inspection team selects certain portions of the audits for inspection, and it reviews the engagement team's work papers and interviews engagement personnel regarding those portions. If the inspection team identifies a potential issue that it is unable to resolve through discussion with the firm and any review of additional work papers or other documentation, the inspection team ordinarily provides the firm with a written comment form on the matter and the firm is allowed the opportunity to provide a written response to the comment form. If the response does not resolve the inspection team's concerns, the matter is considered a deficiency and is evaluated for inclusion in the inspection report.

The inspection team selects the audits, and the specific portions of those audits, that it will review, and the inspected firm is not allowed an opportunity to limit or influence the selections. Audit deficiencies that the inspection team may identify include a firm's failure to identify, or to address appropriately, financial statement

misstatements, including failures to comply with disclosure requirements,⁶ as well as a firm's failures to perform, or to perform sufficiently, certain necessary audit procedures. The inspection may not involve the review of all of a firm's audits, nor is it designed to identify every deficiency in the reviewed audits. Accordingly, a Board inspection report should not be understood to provide any assurance that a firm's audit work, or the relevant issuers' financial statements or reporting on ICFR, are free of any deficiencies not specifically described in an inspection report.

In some cases, the conclusion that a firm did not perform a procedure may be based on the absence of documentation and the absence of persuasive other evidence, even if the firm claimed to have performed the procedure. AS No. 3, *Audit Documentation* ("AS No. 3"), provides that, in various circumstances including PCAOB inspections, a firm that has not adequately documented that it performed a procedure, obtained evidence, or reached an appropriate conclusion, must demonstrate with persuasive other evidence that it did so, and that oral assertions and explanations alone do not constitute persuasive other evidence. In reaching its conclusions, the inspection team considers whether audit documentation or any persuasive other evidence that a firm might provide to the inspection team supports a firm's contention that it performed a procedure, obtained evidence, or reached an appropriate conclusion. In the case of every matter cited in the public portion of a final inspection report, the inspection team has carefully considered any contention by the firm that it did so but just did not document its work, and the inspection team has concluded that the available evidence does not support the contention that the firm sufficiently performed the necessary work.

⁶ When it comes to the Board's attention that an issuer's financial statements appear not to present fairly, in a material respect, the financial position, results of operations, or cash flows of the issuer in conformity with applicable accounting principles, the Board's practice is to report that information to the Securities and Exchange Commission ("SEC" or "the Commission"), which has jurisdiction to determine proper accounting in issuers' financial statements. Any description in this report of financial statement misstatements or failures to comply with SEC disclosure requirements should not be understood as an indication that the SEC has considered or made any determination regarding these issues unless otherwise expressly stated.

Identified deficiencies in the audit work that exceed a significance threshold (which is described in Part I.A of the inspection report) are summarized in the public portion of the inspection report.⁷

The Board cautions against extrapolating from the results presented in the public portion of a report to broader conclusions about the frequency of deficiencies throughout the firm's practice. Individual audits and areas of inspection focus are most often selected on a risk-weighted basis and not randomly. Areas of focus vary among selected audits, but often involve audit work on the most difficult or inherently uncertain areas of financial statements. Thus, the audit work is generally selected for inspection based on factors that, in the inspection team's view, heighten the possibility that auditing deficiencies are present, rather than through a process intended to identify a representative sample.

Inclusion of an audit deficiency in an inspection report does not mean that the deficiency remained unaddressed after the inspection team brought it to the firm's attention. When audit deficiencies are identified after the date of the audit report, PCAOB standards require a firm to take appropriate actions to assess the importance of the deficiencies to the firm's present ability to support its previously expressed audit opinions. Depending upon the circumstances, compliance with these standards may require the firm to perform additional audit procedures, or to inform the issuer of the need for changes to its financial statements or reporting on ICFR, or to take steps to prevent reliance on previously expressed audit opinions.⁸

⁷ The discussion in this report of any deficiency observed in a particular audit reflects information reported to the Board by the inspection team and does not reflect any determination by the Board as to whether the Firm has engaged in any conduct for which it could be sanctioned through the Board's disciplinary process. In addition, any references in this report to violations or potential violations of law, rules, or professional standards are not a result of an adversarial adjudicative process and do not constitute conclusive findings for purposes of imposing legal liability.

⁸ An inspection may include a review of the adequacy of a firm's compliance with these requirements, either with respect to previously identified deficiencies or deficiencies identified during that inspection. Failure by a firm to take appropriate actions, or a firm's misrepresentations in responding to an inspection report, about whether it has taken such actions, could be a basis for Board disciplinary sanctions.

C.2. Review of a Firm's Quality Control System

QC 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, provides that an auditing firm has a responsibility to ensure that its personnel comply with the applicable professional standards. This standard specifies that a firm's system of quality control should encompass the following elements: (1) independence, integrity, and objectivity; (2) personnel management; (3) acceptance and continuance of issuer audit engagements; (4) engagement performance; and (5) monitoring.

The inspection team's assessment of a firm's quality control system is derived both from the results of its procedures specifically focused on the firm's quality control policies and procedures, and also from inferences that can be drawn from deficiencies in the performance of individual audits. Audit deficiencies, whether alone or when aggregated, may indicate areas where a firm's system has failed to provide reasonable assurance of quality in the performance of audits. Even deficiencies that do not result in an insufficiently supported audit opinion may indicate a defect or potential defect in a firm's quality control system.⁹ If identified deficiencies, when accumulated and evaluated, indicate defects or potential defects in the firm's system of quality control, the nonpublic portion of this report would include a discussion of those issues. When evaluating whether identified deficiencies in individual audits indicate a defect or potential defect in a firm's system of quality control, the inspection team considers the nature, significance, and frequency of deficiencies;¹⁰ related firm methodology, guidance, and practices; and possible root causes.

⁹ Not every audit deficiency suggests a defect or potential defect in a firm's quality control system.

¹⁰ An evaluation of the frequency of a type of deficiency may include consideration of how often the inspection team reviewed audit work that presented the opportunity for similar deficiencies to occur. In some cases, even a type of deficiency that is observed infrequently in a particular inspection may, because of some combination of its nature, its significance, and the frequency with which it has been observed in previous inspections of the firm, be cause for concern about a quality control defect or potential defect.

Inspections also include a review of certain of the firm's practices, policies, and processes related to audit quality, which constitute a part of the firm's quality control system. This review addresses practices, policies, and procedures concerning audit performance, training, compliance with independence standards, client acceptance and retention, and the establishment of policies and procedures.

END OF PART I

PARTS II AND III OF THIS REPORT ARE NONPUBLIC
AND ARE OMITTED FROM THIS PUBLIC DOCUMENT

PART IV

RESPONSE OF THE FIRM TO DRAFT INSPECTION REPORT

Pursuant to section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(a), the Firm provided a written response to a draft of this report. Pursuant to section 104(f) of the Act and PCAOB Rule 4007(b), the Firm's response, minus any portion granted confidential treatment, is attached hereto and made part of this final inspection report.¹¹

¹¹ The Board does not make public any of a firm's comments that address a nonpublic portion of the report unless a firm specifically requests otherwise. In some cases, the result may be that none of a firm's response is made publicly available. In addition, pursuant to section 104(f) of the Act, 15 U.S.C. § 7214(f), and PCAOB Rule 4007(b), if a firm requests, and the Board grants, confidential treatment for any of the firm's comments on a draft report, the Board does not include those comments in the final report at all. The Board routinely grants confidential treatment, if requested, for any portion of a firm's response that addresses any point in the draft that the Board omits from, or any inaccurate statement in the draft that the Board corrects in, the final report.

Ms. Helen Munter
Director
Division of Registration and Inspections
Public Company Accounting Oversight Board
1666 K Street N.W.
Washington, D.C. 20006

Re: Response to the 2014 inspection for KBL, LLP dated August 22, 2014

Dear Ms. Munter:

We respectfully submit our written response to the 2014 inspection for KBL, LLP (the "Firm") dated August 22, 2014.

We support the PCAOB's inspection process, and believe that the comments and observations enhance the ability to achieve our shared objective of improving audit quality. We have taken this opportunity to make improvements to our audit quality, including changes to methodologies applied in particular engagements, and will focus continuing education courses geared towards industries impacting our audit clients, with a focus on the areas identified in the inspection report. We will strive to continue to improve our audit quality and integrate solutions for the observations made by the inspection team as well as continue to make the necessary improvements that result from the continuing education courses we take as well as through implementation of recently approved standards by all the governing bodies we adhere to.

The inspection team identified a deficiency involving revenue recognition related to the audit of one Issuer, that in their view was of such significance that it appeared that the Firm, at the time it issued its audit report, had not obtained sufficient appropriate audit evidence to support its opinion that the financial statements were presented fairly, in all material respects, in accordance with the applicable financial reporting framework. The Firm agrees with the inspection team findings and the inspection report, and as a result of the deficiency noted, and after careful consideration and discussion with the registrant in which this comment related to, the Firm restated their audit opinion upon completion of additional audit procedures. The Firm immediately started the process of making the necessary enhancements upon receipt of the inspection report of 2014.

The audit deficiency included in our 2014 inspection report related to Issuer A. The inspection team noted the Firm's failure to identify, or to address appropriately, a departure from generally accepted accounting principles ("GAAP") that related to a potentially material misstatement in the audited financial statements concerning revenue recognition (AS No. 14, paragraph 30).

This finding represents a circumstance in which the inspection team determined that the Firm failed to comply with the requirement to obtain sufficient appropriate audit evidence to support its opinion that the financial statements were presented fairly, in all material respects, in accordance with applicable financial reporting framework.

The Firm considered the sections of AU 230, *Due Professional Care in the Performance of Work*, Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement* as well as Auditing Standard No. 15, *Audit Evidence* as well as Auditing Standard No. 14, *Evaluating Audit Results*, in our consideration to restate our audit opinion for Issuer A, and to apply expanded training of the staff and partners on all of our engagements moving forward. We will continue to monitor adherence to these standards on all engagements.

As a result of this finding, the Firm will continue to improve on the identified areas and continue to monitor our improvement. The areas specifically relate to:

- The lack of due care from the planning of the engagement to the performance of the audit testing and in the review and quality concurring review stages;
- Taking into account all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial statements including (a) the results of analytical procedures performed in the overall review of the financial statements; (b) misstatements accumulated during the audit, including, in particular, uncorrected misstatements; (c) the qualitative aspects of the company's accounting practices; (d) conditions identified during the audit that relate to the assessment of the risk of material misstatement due to fraud; (e) the presentation of the financial statements, including the disclosures; and (f) the sufficiency and appropriateness of the audit evidence obtained;
- Full review of ASC 605, as well as ASU 2014-09 and Staff Audit Practice Alert 12 relating to revenue recognition especially the sections related to the finding which resulted in a restatement of our previously issued audit opinion; and
- More careful attention to the quality concurring review process.

The PCAOB inspection process continues to be a very valuable platform for the Firm to improve its PCAOB and overall audit practice. We appreciate the professional, patient, and detailed approach taken by the inspection team, and found the entire process beneficial to improving our practice.

The Firm works diligently in improving our audit quality and looks to find ways to improve our systems daily. The Firm has a commitment to the profession, to the Board, and to its Issuer clients, to ensure that due care and professionalism is provided on each and every engagement at all times. The Firm has made significant improvements since its last inspection and we will continue to make improvements and continue to monitor our progress.

We appreciate this opportunity to respond to the to the 2014 inspection for KBL, LLP dated August 22, 2014. We look forward to further discussion on this matter.

Sincerely,

Michael Pollack

Michael Pollack, CPA

APPENDIX A

AUDITING STANDARD REFERENCED IN PART I

This Appendix provides the text of the auditing standard paragraph that is referenced in Part I.A of this report. Footnotes that are included in this Appendix, and any other Notes, are from the original auditing standard that is referenced. While this Appendix contains the specific portions of the relevant standard cited with respect to the deficiency in Part I.A of this report, other portions of the standard (including those described in Part I.B of this report) may provide additional context, descriptions, related requirements, or explanations; the complete standard is available on the PCAOB's website at <http://pcaobus.org/STANDARDS/Pages/default.aspx>.

AS No. 14, <i>Evaluating Audit Results</i>		
Evaluating the Presentation of the Financial Statements, Including the Disclosures		
AS No. 14.30	The auditor must evaluate whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework. Note: AU sec. 411, <i>The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles</i>, establishes requirements for evaluating the presentation of the financial statements. Auditing Standard No. 6, <i>Evaluating Consistency of Financial Statements</i>, establishes requirements regarding evaluating the consistency of the accounting principles used in financial statements. Note: The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.	Issuer A
